THE PAST IS NEVER DEAD to premiere May 17, 2019 on Amazon Prime

St. Louis, March 18, 2019 – The criminal justice feature documentary THE PAST IS NEVER DEAD will premiere May 17, 2019 on Amazon Prime, available for streaming, rental, and purchase. The film release coincides with the one-year anniversary of David Robinson’s exoneration and release from prison.

The film details the story of David Robinson’s nearly eighteen-year struggle to prove his innocence and the devastating effects wrongful convictions have on not just the falsely accused but on their family and community.

In the fall of 2000 David was arrested for murder in Sikeston, Missouri, a small southern cotton town near the Mississippi River. With the testimony of two suspect criminal informants he was sentenced to life in prison without parole. There was no evidence, DNA, or confession, and he had multiple alibis. The true killer confessed on audiotape in 2004 and committed suicide in 2009, and both informants have recanted under oath, claiming police coercion. Yet the state of Missouri held him in prison until May 2018.
